

We want to hear your story!

Are you a parent, caregiver, or young person with experience of paediatric low-grade glioma (pLGG) in Australia?

As part of a Monash University Honours research project, in collaboration with Ipsen Pharmaceuticals*, we're developing a Patient Journey Map (PJM) to capture the real-life experiences of Australian families affected by pLGG—from diagnosis to treatment, follow-up, and beyond.

MONASH
University

MUHREC Project ID: 48409

Why Your Voice Matters

There is currently very little Australian research that captures what it's really like to navigate pLGG care. Your insights can help:

- Improve how health services communicate and coordinate care
- Highlight gaps in diagnosis, treatment, and survivorship support
- Empower advocacy with real-world, lived experience evidence
- Support health policy and funding for better access to new therapies

Your contribution will help make this map a powerful tool for health professionals, decision-makers, and advocacy groups to better support future families.

About the interviews

- 🕒 **Flexible (30–90 mins)**
- 📞 **Held by phone, Zoom, or in person—whatever suits you**
- 💬 **Semi-structured—you guide what you're comfortable sharing**
- 🎁 **A thank-you gift voucher provided for your time**

WHO WE'RE LOOKING FOR

You are a parent or caregiver of a child with pLGG

Family members (18+) of pLGG patients

Young adults or adults (18+) who were treated for pLGG during childhood

You feel comfortable sharing your story in an interview

You want to help improve the journey for others navigating pLGG
